# Project Recap

**Client:** Social Buzz - Social media & content creation platform  
Founded in 2010, HQ in San Francisco  
250 employees, 500M+ monthly active users

**Objectives:**

Audit big data practices  
Provide IPO recommendations  
Analyze top content categories

**Approach:**

3-month initial project to demonstrate value  
Leverage internal expertise and past client stories  
Data extraction, analysis, and stress testing  
Collaborative workshops with client teams

# Project Recap

## **Deliverables:**

- Big data best practices presentation
- Sample data analysis and visualizations
- Data center audit
- IPO best practice documentation
- Technology architecture review

## **Goals:**

- Prepare for successful IPO by end of next year
- Implement big data management best practices
- Identify opportunities in content strategy

# Problem

- 500M+ monthly active users
- 100,000+ pieces of content posted daily!
- Data is highly unstructured
- Analysis to identify top 5 content categories by popularity

# Summary

- The two most popular content categories are science and animals, indicating that people are most drawn to "real-life" and "factual" information.
- The top 5 categories all have food as a common theme, with "healthy Eating" coming in first. This could provide insight into your user base's audience. With this knowledge, you might develop a campaign and collaborate with companies that promote healthy eating to increase user engagement.
- Although this analysis is enlightening, it's time to put it into large-scale production to gain a real-time understanding of your company. We can walk you through the process.

# Thank you!
